Table 15.--Water Features

(Depths of layers are in inches. See text for definitions of terms used in this table. Estimates of the frequency of ponding and flooding apply to the whole year rather than to individual months. Absence of an entry indicates that the feature is not a concern or that data were not estimated. In the "Water table" column, more than one value for a month for the upper and lower limits indicates that the soil has both a perched and an apparent water table.)

Table 17.--Taxonomic Classification of the Soils

(An asterisk in the first column indicates a taxadjunct to the series. See text for a description of those characteristics that are outside the range of the series.)

Soil name	Family or higher taxonomic class
Ahrs[1]	Ashy-skeletal over loamy-skeletal, amorphic over isotic, frigid Typic Udivitrands
Alecanyon	Sandy-skeletal, mixed, mesic Vitrandic Haploxerolls
Aquepts	Aquepts
Ardenvoir	Loamy-skeletal, isotic, frigid Vitrandic Haploxerepts
Ardtoo	Loamy-skeletal, isotic, frigid Vitrandic Haploxerepts
Arson	Fine-loamy, mixed, superactive, frigid Vitrandic Haploxeralfs
Athena	Fine-silty, mixed, superactive, mesic Pachic Haploxerolls
Bechtel[1]	Fine-loamy, mixed, superactive, frigid Vitrandic Hapludalfs
Bellslake	Coarse-silty, mixed, superactive, nonacid, frigid Aquandic Humaquepts
Benewah[1]	Fine-silty, isotic, frigid Vitrandic Haploxeralfs
Blackprince	Loamy-skeletal, isotic, frigid Vitrandic Haploxerepts
Blinn[1]	Loamy-skeletal, isotic, frigid Vitrandic Haploxerepts
Bobbitt	Loamy-skeletal, isotic, mesic Vitrandic Argixerolls
Bong	Sandy, mixed, mesic Vitrandic Haploxerolls
*Bonner	Ashy over sandy or sandy-skeletal, glassy over isotic, frigid Typic Vitrixerands
Bouldercreek	Ashy over loamy-skeletal, amorphic over isotic, frigid Typic Udivitrands
Boulderjud	Ashy over loamy-skeletal, amorphic over isotic, frigid Typic Udivitrands
Brevco	Loamy-skeletal, isotic, frigid Vitrandic Haploxerepts
*Brickel	Ashy-skeletal, amorphic Humic Vitricryands
Bridgeson	Fine-loamy, mixed, superactive, frigid Aquandic Endoaquolls
Brincken	Loamy-skeletal, mixed, superactive, mesic Vitrandic Argixerolls
Broadax	Fine-silty, mixed, superactive, mesic Calcic Argixerolls
Brodeer	Ashy over loamy, amorphic over mixed, superactive, frigid Alfic Udivitrands
Cald	Fine-silty, mixed, superactive, mesic Typic Argiaquolls
Caldwell	Fine-silty, mixed, superactive, mesic Cumulic Haploxerolls
Carlinton	Fine-silty, mixed, superactive, frigid Vitrandic Fragixeralfs
Cassyhill	Loamy-skeletal, isotic, mesic Lithic Ultic Haploxerolls
Cavendish[1]	Fine-loamy, mixed, superactive, frigid Vitrandic Haploxeralfs
Cedonia	Fine-silty, mixed, superactive, mesic Vitrandic Haploxerepts
Cheney	Coarse-loamy over sandy or sandy-skeletal, mixed, superactive, mesic Vitrandic Haploxerolls
Clayton	Coarse-loamy, isotic, mesic Vitrandic Haploxerepts
Cocolalla	Ashy, glassy, mesic Aquandic Endoaquolls
*Colburn	Coarse-loamy, mixed, superactive, frigid Aquandic Haploxerepts
Crumarine[1]	Coarse-loamy, isotic, frigid Aquandic Haploxerepts
Dearyton	Fine, isotic, mesic Vitrandic Palexeralfs
Deno	Coarse-loamy, mixed, superactive, mesic Vitrandic Haploxerolls
*Driscoll	Fine, mixed, superactive, mesic Aquic Palexerolls
Elmira	Mixed, frigid Lamellic Xeropsamments
Eloika	Ashy over loamy, glassy over isotic, frigid Typic Vitrixerands
Emdent	Ashy, glassy, calcareous, mesic Aquandic Endoaquolls
Endoaquolls	Endoaquolls
Fan Lake	Fine-loamy, isotic, frigid Andic Haploxeralfs
Fluvaquentic Haplosaprists[1]	Fluvaquentic Haplosaprists
Fluvaquents	Fluvaquents
Fourmound	Coarse-loamy, isotic, mesic Vitrandic Haploxerolls
Freeman	Fine-silty, mixed, superactive, mesic Aquandic Palexeralfs
Garfield	Fine, mixed, superactive, mesic Mollic Haploxeralfs
Garrison	Loamy-skeletal, isotic, mesic Vitrandic Haploxerolls
Gibbs	Fine-loamy, isotic, mesic Vitrandic Argixerolls
Glenrose	Fine-loamy, isotic, mesic Vitrandic Argixerolls
Grangemont[1]	Fine-silty, mixed, active, frigid Andic Glossudalfs
Green Bluff	Coarse-loamy, isotic, frigid Vitrandic Haploxerepts
Hagen	Sandy, isotic, mesic Vitrandic Haploxerepts
Hanning	Fine-silty, mixed, superactive, mesic Pachic Argixerolls
Haploxerolls	Haploxerolls
Hardesty	Ashy, glassy, mesic Vitrandic Haploxerolls

Table 17.--Taxonomic Classification of the Soils--Continued

Soil name	Family or higher taxonomic class
Honeyjones[1]	Ashy over loamy-skeletal, amorphic over isotic, frigid Typic Udivitrands
*Hoodoo	Ashy, glassy, nonacid, frigid Aquandic Humaquepts
Huckle	Ashy over loamy-skeletal, amorphic over isotic, frigid Typic Udivitrands
*Hunters	Coarse-silty, mixed, superactive, mesic Vitrandic Haploxerolls
Hysing	Ashy over sandy or sandy-skeletal, amorphic over isotic, frigid Typic Udivitrands
Jacot	Ashy over loamy, amorphic over isotic, frigid Alfic Udivitrands
Kaniksu	Sandy, isotic, frigid Vitrandic Haploxerepts
*Keeler	Fine-loamy, isotic, frigid Vitrandic Hapludalfs
Kellerbutte	Ashy over loamy-skeletal, glassy over isotic, frigid Typic Vitrixerands
Klickson	Loamy-skeletal, isotic, frigid Vitrandic Argixerolls
Kramerhill	Fine-loamy, isotic, mesic Vitrandic Haploxeralfs
Kronquist	Fine-loamy, isotic, frigid Aquandic Endoaqualfs
Kruse	Fine-loamy, isotic, frigid Vitrandic Haploxeralfs
Lacy	Loamy-skeletal, mixed, superactive, mesic Lithic Ultic Argixerolls
Lakespring	Fine-loamy, mixed, superactive, mesic Vitrandic Haploxeralfs
Lakestarr	Fine-loamy, isotic, frigid Andic Hapludalfs
Lance	Fine-silty, mixed, superactive, mesic Calcic Haploxerepts
Larkin	Fine-silty, mixed, superactive, mesic Ultic Argixerolls
Latah	Fine, mixed, superactive, mesic Xeric Argialbolls
Latahco[1]	Fine-silty, mixed, superactive, frigid Argiaquic Xeric Argialbolls
Lenz	Loamy-skeletal, isotic, mesic Vitrandic Haploxerolls
Libertybutte	Loamy, mixed, superactive, mesic Lithic Argixerolls
Lotuspoint	Loamy-skeletal, isotic, mesic Andic Haploxerepts
Lovell	Fine-silty, isotic, frigid Aquandic Epiaqualfs
*Lovell	Fine-silty, isotic, frigid Aquandic Haploxeralfs
Marble	Mixed, mesic Lamellic Xeropsamments
Marblespring	Sandy-skeletal, mixed, mesic Typic Xerorthents
McCrosket	Loamy-skeletal, isotic, frigid Vitrandic Haploxerolls
Micapeak	Coarse-loamy, isotic, frigid Vitrandic Haploxerepts
*Mondovi	Coarse-silty, mixed, superactive, mesic Vitrandic Haploxerolls
Morical	Fine-loamy, mixed, superactive, mesic Vitrandic Argixerolls
Naff	Fine-silty, mixed, superactive, mesic Typic Argixerolls
Nakarna	Ashy over loamy, amorphic over micaceous, frigid Typic Udivitrands
Narcisse	Coarse-loamy, mixed, superactive, mesic Cumulic Haploxerolls
*Nez Perce	Fine, mixed, superactive, mesic Xeric Argialbolls
Northstar	Loamy-skeletal, mixed, superactive, mesic Vitrandic Haploxerolls
Opportunity	Loamy-skeletal, isotic, mesic Vitrandic Haploxerolls
Peone	Ashy, glassy, nonacid, mesic Aquandic Endoaquepts
Phoebe	Coarse-loamy, mixed, superactive, mesic Vitrandic Haploxerolls
Pinecreek	Ashy over loamy-skeletal, glassy over isotic, frigid Humic Vitrixerands
Pywell	Euic, frigid Typic Haplosaprists
Quinnamose	Coarse-loamy, isotic, frigid Vitrandic Haploxerepts
Rasser[1]	Loamy-skeletal, isotic, frigid Vitrandic Haploxeralfs
Reardan	Fine, mixed, superactive, mesic Typic Palexerolls
Reggear[1]	Fine-silty, mixed, active, frigid Vitrandic Fraglossudalfs
Rockly	Loamy-skeletal, mixed, superactive, mesic Lithic Haploxerolls
Saint Maries[1]	Loamy-skeletal, isotic, frigid Vitrandic Eutrudepts
Saltese	Euic, mesic Typic Haplosaprists
Santa	Coarse-silty, mixed, superactive, frigid Vitrandic Fragixeralfs
Schumacher	Fine-loamy, mixed, superactive, mesic Ultic Argixerolls
Scoap	Loamy-skeletal, isotic, frigid Vitrandic Haploxerolls
Scrabblers	Sandy, isotic, frigid Andic Haploxerepts
Seaboldt	Coarse-loamy, isotic, mesic Vitrandic Haploxerolls
Setters[1]	Fine, smectitic, frigid Ultic Palexerolls
Sharptop[1]	Coarse-silty, isotic, frigid Vitrandic Haploxeralfs
Sinkler	Fine-silty, mixed, superactive, frigid Vitrandic Haploxeralfs
Skalan	Loamy-skeletal, isotic, mesic Vitrandic Haploxeralfs
*Southwick	Fine-silty, mixed, superactive, mesic Vitrandic Argixerolls
Speigle	Loamy-skeletal, isotic, mesic Vitrandic Haploxerolls
Spens	Sandy-skeletal, mixed, mesic Typic Xerorthents
Spokane	Coarse-loamy, isotic, mesic Vitrandic Haploxerolls

Table 17.--Taxonomic Classification of the Soils--Continued

Soil name	Family or higher taxonomic class
Springdale	Sandy-skeletal, isotic, mesic Vitrandic Haploxerepts
Staley	Fine-silty, mixed, superactive, mesic Calcic Haploxerolls
Stapaloop	Coarse-loamy, isotic, frigid Vitrandic Haploxerepts
Stien	Ashy-skeletal over loamy-skeletal, aniso, glassy over isotic, frigid Typic Vitrixerands
Stutler	Loamy-skeletal, isotic, mesic Vitrandic Haploxerepts
Swakane	Loamy-skeletal, mixed, superactive, mesic Lithic Ultic Haploxerolls
Taney	Fine-silty, mixed, superactive, frigid Vitrandic Argixerolls
Tekoa	Loamy-skeletal, mixed, superactive, mesic Vitrandic Argixerolls
Thatuna	Fine-silty, mixed, superactive, mesic Oxyaquic Argixerolls
Tilma	Fine, mixed, superactive, mesic Xeric Argialbolls
Torboy	Sandy, isotic, frigid Vitrandic Haploxerepts
*Tucannon	Fine-loamy, mixed, superactive, mesic Vitrandic Haploxerolls
Uhlig	Coarse-loamy, mixed, superactive, mesic Vitrandic Haploxerolls
Vay[1]	Medial over loamy-skeletal, amorphic over isotic Typic Vitricryands
*Vaywood	Medial over loamy-skeletal, amorphic over isotic Typic Vitricryands
Wapal	Sandy-skeletal, isotic, frigid Vitrandic Haploxerepts
Wolfeson	Coarse-loamy, isotic, frigid Oxyaquic Vitrandic Haploxerepts
Xerolls	Xerolls

[1]In the detailed soil map units, these soils are minor components only. A taxonomic unit description is not included in this report.

Accessibility Statement

The U.S. Department of Agriculture is committed to making its electronic and information technologies accessible to individuals with disabilities by meeting or exceeding the requirements of Section 508 of the Rehabilitation Act (29 U.S.C. 794d), as amended in 1998. Section 508 is a federal law that requires agencies to provide individuals with disabilities equal access to electronic information and data comparable to those who do not have disabilities, unless an undue burden would be imposed on the agency. The Section 508 standards are the technical requirements and criteria that are used to measure conformance within this law. More information on Section 508 and the technical standards can be found at www.section508.gov.

If you require assistance or wish to report an issue related to the accessibility of any content on this website, please email Section508@oc.usda.gov. If applicable, please include the web address or URL and the specific problems you have encountered. You may also contact a representative from the USDA Section 508 Coordination Team.
